## 1. Safety precautions

In order to avoid possible damage to you, others or any property, please make sure to pay attention to the following safety precautions.

If the machine power line is out of order, you must entrust machine manufacturer, maintenance service center or qualified technicians to replace it to keep danger away.

### WARNING

Do not touch power plug with wet hands.

Wet hand forbidden

Or else may cause electric shock.

Please make sure to turn off the power before cleaning machine.

Unplug ! Else it may cause machine sudden running and further electric shock accident.

Forbidden

Prohibited to use beyond power or connected devices beyond specified value.

Only can use 220V~alternating current (AC) power supply

Overheating and fire accident may occur if you use universal socket or devices beyond specified value.

Please insert the plug completely into the power socket before starting the air purifier. If not, it may cause electric shock and overheating, even fire accident.

- Do not use damaged plug or loose power socket.

Forbidden

No damage to power line and socket.

! Do not bind wires when you use this machine. It may cause electric shock, short circuit and fire accident if you use broken wires.

- Any cutting and scratching, refitting, over distorting, twisting, screwing and pulling of lines are all forbidden. Do not put any heavy product on wires and sockets.

Regularly clean power plug

If dust accumulating on power plug, the dampness will make damage to insulation part of the plug, thus causing fire accident.

- Pull out the power plug and then clean with dry cloth (do not use wet cloth).
- If the machine will be of no use for long time, please unplug it.

Taking apart is forbidden

Do not take apart or modify the air purifier without authorization.

Taking apart or modifying air purifier without authorization may cause electric shock, malfunction or fire accident.

Forbidden

Do not put bars or metal products nearby air outlet or openings.

! Else it may touch the internal parts and get an electric shock or damage.

# User manual

## Notice

Please turn off the power immediately in case of any of the following situations:

- Malfunction of any switch;
- Circuit breaker worked or fuse burned
- Anomal heating of wires or plugs
- Any burnt smell, anomal sound or shock
- Any other anomaly or malfunction

## Notice

Forbidden !

Do not use solvent like benzene, diluent, etc. to clean air purifier. keep the machine away from wasp spray

Or else air purifier may broke into damage even short circuit occurs which can lead electric shock or fire accident.

Hold the plug when you take out the power plug and do not pull wires which may cause short circuit or damage to wires to avoid fire accident and electric shock.

Forbidden ! For example kitchen which can reduce the service life of air purifier filter.

Do not use air purifier in the situation of greasy particle.

- This machine should not be used as ventilating or air evacuating equipment.

If the air purifier works together with electric heater, the room should keep ventilation.

Or else there may be carbon monoxide poisoning accident.

- The air purifier cannot clear off carbon monoxide.

Forbidden !

Do not use the air purifier in the room with fumigation type pesticides.

Chemical residue could be accumulated inside the machine and then release from the outlet, making harm to health.

- The room should keep ventilated thoroughly after you use insecticide and then start to use air purifier.

Wetting forbidden !

Do not use air purifier in high temperature, humid conditions like bath room, as these situations may cause current leakage which can lead electric shock or fire accident.

Wetting forbidden !

Keep machine body dry,

Or else it may cause electric shock or fire accident because of short circuit.

Keep away from flame !

Keep the machine away from volatile substances or flammable items such as tobacco and sparks;

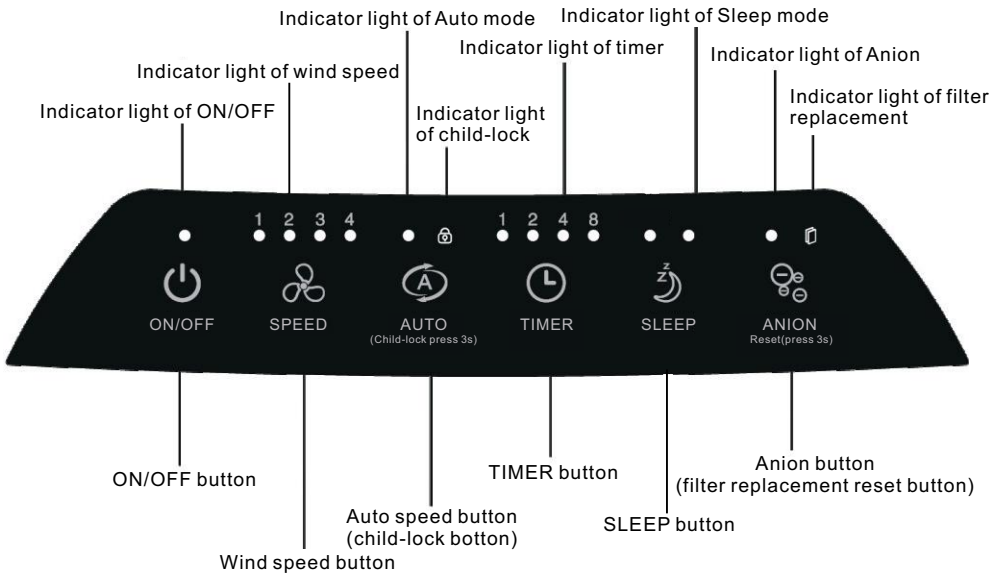

Or else it may cause fire accident.

## Disassembly and installation methods of the side cover

### 1 Disassembly method of the side covers.

Press play button in the side covers and press play button in the left and right cover and pull the cover, then you can lift the left and right cover and pull out slightly.

### 2 Installation method of the side covers

To reinstall the side covers, please align at the fixed groove and insert the cover into the groove, then side covers will be absorbed automatically.

## Placement of air purifier

To make sure good air circulation effect, please ensure there is 50cm distance between air inlet and wall or curtain. Besides, the distance to air outlet is not less than 50cm. Please keep 1 meter or more distance from TV, Radio.

Please do not use the same socket with TV, radio and other appliances which can avoid picture flutter or noise.

It may make wall surface around machine body dirty if you place the machine in the same place for a long time.

Do not obstruct air inlet and outlet, ensuring enough ventilation and high efficiency.

# User manual

## Install filter net

### Information

All the filters are equipped with machine together, you should get rid of the filter packings before use them. Please disassemble filter and get rid of packings according to the following instructions, replace the filter to air purifier.

### ⚡ ATTENTION

Make sure power plug is outage when do installation, maintenance or transportation work.

Do not operate machines without filter.  
Please get rid of filter packings before use.

- 2 Press play button in the left and right cover and pull the cover, then you can lift the left and right cover and pull out slightly.

1

2

- 3 Disassemble all the internal filter.

## Operating steps

Operate in accordance with the following steps to ensure correct filter installation when you first use this machine

- 1 Remove all the packings and place machine in a dry, smooth and flat ground.

- 4 Remove all filter packings.

# User manual

5 Replace filters into the air purifier.

6 To reinstall the side covers, please align at the fixed groove and insert the cover into the groove, then side covers will be absorbed automatically.

Hint

Please be careful when install the back cover, watch your hands.

## Understand functions of the filter net

### Composition of the filter net

# User manual

## Gathering multiple functions in one

- Efficient purification of PM2.5, smoke, pollen and other particulate pollutants
- Formaldehyde elimination
- 4 wind speeds design
- Timer mode
- Filter replacement indicator
- Configured with manual, automatic and sleep modes
- Digital display of PM2.5
- Air quality indicator by colors

## Unique 4 steps purification technology

**Pre-filter** Intercepting hair, fiber, large particles, dander, etc.

**HEPA filter** can effectively remove PM2.5, smoke, pollen, mites and other particles

**High quality modified activated carbon filter** is made of high quality activated carbon and modified by special proprietary technology to purify formaldehyde and other gas pollutants efficiently.

**Negative ions** "vitamin in the air", the machine releases a lot of negative oxygen ions, making the air fresh and natural.

# 4 How to use

## Function description of control panel

- 1 Anion(filter replacement reset )button
- 2 SLEEP button
- 3 TIMER button
- 4 Auto speed (child-lock) button
- 5 Wind speed button
- 6 ON/OFF button
- 7 Indicator light of air quality
- 8 Digital display of PM2.5

### Plug in

After plugged in the power, the indicator lights will flash twice, with beeps, then the indicator lights will be off.

# User manual

## Turn on the air purifier

After plugged in the power, all the indicator lights will be inspected automatically in turn, after flashing the air purifier will enter AUTO mode. Press ON/OFF button to turn on the purifier (as shown in above figure), the air quality sensor will detect the air quality automatically after 10min's preheating. It will show the air quality by different indicator light's colour (as shown in below figure).

### Indicator light's colour of air quality

 Blue	Good
 Green	Ordinary
 Red	Poor

### Hint

If you want to turn off the air purifier, please press ON/OFF button again, until the power light off, then pull out the power plug.

## Auto mode

After plugged in the power, the air purifier enters ready mode. Press ON/OFF button, then the air purifier will on and enter AUTO mode. Under this mode, the air purifier will choose wind speed automatically according to the air quality.

### Attention

The indicator light of air quality will be on when the air purifier turn on.

When the room is in high humidity, air quality sensor may force condensate water in surface. In this condition, even the air quality is good, air quality sensor may show poor air quality.

In this condition, the fan will operate by high speed, so you must clean air quality sensor or set manually to solve it.

# User manual

## Manual adjustment of wind speed

1 2 3 4  
○ ○ ○ ○

Press SPEED button, the wind speed will change circularly in AUTO mode, speed 1, speed 2, speed 3.

## Sleep mode

Under AUTO mode, if the lighting in the room is dark the air purifier will enter SLEEP mode automatically after 3minutes. Then all the indicator lights will be off except the power light. The fan speed and noise level will change to the lowest. When the lighting in the room brightened for 3 minutes, the air purifier will re-start working.

### Attention

SLEEP mode only applies to the condition that the air purifier works under AUTO mode.

## Timer mode

1 2 4 8  
○ ○ ○ ○

Press TIMER button, the working time can be choose in 1h,2h,4h and 8h.

## ANION function

Press ANION button,with beeps, anion function will work, and the indicator light of ANION will be on. Press ANION button again, the purifier will out of anion function , the indicator light of ANION will be off. When filter replacement indicator light be on, user needs to replace the filter and press ANION button 3s to reset, then wind speed indicator light will stop flash.

## Child-lock function

When running the machine (except sleep mode),press the Child-lock button for 3s, with beeps the indicator light of Child-lock will be on. In this condition, the purifier won't be action when you press any key (except Child-lock button).

# User manual

## 5 Maintenance and cleaning methods

Please pull out the power plug before cleaning.

Please do not put the product into water or any liquid.

Please do not use cleaning agents with high abrasiveness, corrodibility or inflammability (such as decolorizer or alcohol) to clean any part of this product.

Only pre-filter can be washed. Compound filter nets cannot be washed.

### Clean the air purifier

Clean inner side and outer side of air purifier regularly to prevent dust gathering.

1. Use soft and dry clothes to remove dust on the air purifier.
2. Use soft and dry clothes to clean air inlets and air outlets.

### ⚡ Attention

When the outlet cover is installed, the position of the buckle must be correct. If the installation is not in place, the machine will not be turned on.

# User manual

## Change filter net

### Information

When the indicator light of filter replacement flashes, it is to alert the user to replace the corresponding filter.

Replace filter when the light is normally on, reminding customers replace filter.

### ⚡Attention

The fan will off after the indicator light of filter replacement flashes for 1 minute, and the air purifier will beeps to remind the users to replace the filters.

### ⚡Attention

Please turn off the power and pull out the power plug before filter replacement. If the indicator light of filter replacement flashes again after replaced the filters, please press the reset button at side by screw driver, until the indicator light off (as shown in below figure).

### 💬 Hint

Please remove the package of each filter before putting them into the machine and please make the label of filter face upward.

## Operating steps

- 1 The machine remind to replace the filters.

- 2 Turn off the power, then pull out the power plug.

- 3 Press play button in the left and right cover and pull the cover, then you can lift the left and right cover and pull out slightly.

# User manual

- 4 Remove all the filters assembly, change the activated carbon filter and HEPA filter.

- 7 To reinstall the side covers, please align at the fixed groove and insert the cover into the groove, then side covers will be absorbed automatically.

- 5 Remove the packages of the filters, then install the activated carbon filter and HEPA filter into the air purifier in order.

- 8 When the filter replacement is completed, plug in and turn on the air purifier, press the ANION button for 3s to reset the machine.

- 6 Install the filters into the air purifier.

# User manual

## Long-time idling

Pull out power plug( there is also power consumption in standby mode)

Dry machine inside thoroughly (else there maybe malfunction because of rust)

Place the machine in dry and ventilating place (do not place flat or upside down to avoid malfunction)

## Suggested frequency of replacing the filter net

In general, the life span of HEPA filter is 6 months. You could use brush or dust collector to remove dust on surface of the filter, do not press hard. Never use water to wash the HEPA and activated filter, only the pre-filter can be washable.

## Attention

Please turn off and pull out power plug before replacing the filters.

## 6 Fault handling

The following table lists failure possible to appear in dairy use. Please contact company service center or dealer if you cannot find answer from the listed examples.

Staus	possible reason	possible solution
Machine cannot work	The front panel may not be installed correctly	disassemble front panel and re-install it.
	power supply for plug	pull out the plug and pull in again
	power plug or wire is wrong	contact customer service center or deal
fan doesn't work	machine doesn't turn on	plug in and turn on
	motor is wrong	contact customer service center or dealer
	Machine on uneven ground	move to even and flat ground
	loose or foreign particles come inside	contact customer service center or dealer
	motor is loose	contact customer service center or dealer
	filter packing is not removed	please remove packing of every filter
bad performance	washable filter is dirty	wash the dirty filter
	Filters need to be replaced	replace new filter
	machine inlet or outlet blocked	contact customer service center or dealer
	filter plastic packing is not removed	removed packing and then use .
	there is no enough space around machine	please ensure there is 50cm distance between two- side air inlet, the distance to air outlet is not less than 10cm.
	lack of filter or the filter is not properly placed	Make sure all the filters are placed in order in accordance with instructions
	exceed cover	check whether room area is in accordance with the machine effective cover area.
